HEAD LICE

Dear Parents and Caregivers,
A case of head lice has recently been reported in your child's class.

Please check your child's or children's hair carefully. If lice and/or nits are present, please treat with a commercial lice product according to its instructions, available from the chemist and retreat if necessary.

ALL "eggs" should be removed from the hair. The eggs resemble a grain of rice or dandruff.

Once the hair is treated, students may return to class. **PLEASE repeat the treatment AGAIN in 7 days. Wash all bed linen, pillow slips and HATS.**

Your help in this matter is much appreciated.

Mr Trev Mason
Principal
